4       This Act may be cited as the “Hematological Cancer  
5       Research Investment and Education Act of 2001”.

6       **SEC. 2. FINDINGS.**

7       Congress finds that:

1           (1) An estimated 109,500 people in the United  
2 States will be diagnosed with leukemia, lymphoma,  
3 and multiple myeloma in 2001.

4           (2) New cases of the blood cancers described in  
5 paragraph (1) account for 8.6 percent of new cancer  
6 cases.

7           (3) Those devastating blood cancers will cause  
8 the deaths of an estimated 60,300 persons in the  
9 United States in 2001. Every 9 minutes, a person  
10 in the United States dies from leukemia, lymphoma,  
11 or multiple myeloma.

12           (4) While less than 5 percent of Federal funds  
13 for cancer research are spent on those blood cancers,  
14 those blood cancers cause 11 percent of all cancer  
15 deaths in the United States.

16           (5) Increased Federal support of research into  
17 leukemia, lymphoma, and multiple myeloma has re-  
18 sulted and will continue to result in significant ad-
